www.mosaicwallmurals.com

We specialize in providing high quality, murals for your home, school, company or organization. The murals can be applied just like wallpaper or can be finished with pole pockets for hanging. Murals can also be installed on windows with a window perforated print that allows viewers to see the image from the outside, yet allows light and the outside view to enter.

We use a photo mosaic process in which your mural image is made up of many individual tiles or photos, which when viewed from a distance, resolves into your mural.

Murals can be output on polyethylene, rigid PVC, Mesh. Backlit vinyl, Styrene, Sintra, Coroplast, Cardstock, Fabric, or Paper.

If you would rather have the mural printed locally, we can also simply generate a digital file.

We can design your mural for you based on your specifications or you can send it to us in any number of formats including print, photo, or any digital format you may have including Photoshop, Illustrator, CorelDraw and others.

You then send us your collection of individual photos in digital format such as jpg, tiff, bmp, gif or Photoshop, the more photos you have the better! A minimum number would be around 100, we have done murals with as many as 4500 individual images.

We prefer to have you send the photos on a CD, DVD or flash memory. Once we have your mural image and collection of photos, we apply our mosaic software and send you a proof of your assembled mural, once approved, the file is printed at 360 dpi on heavy gauge vinyl which can be hung or can be applied just like wallpaper. We can also do smaller output such as posters...

Step 1

Send us the image or picture you would like made into a mural or poster. This can be on paper, illustration board, canvas, computer printout, photograph or in any digital format such as Photoshop, Illustrator, Corel Draw, jpeg, bmp, tiff etc. You can send it via an [email attachment](#), on a disk, or send the actual image via the U.S. mail. If you would like us to design the mural for you, based on your specifications, we are able and willing to do that as well.

Step 2

Tell us the size of the mural or poster. This needs to be proportional to the image from above. For example a 5x7 photo could be done as a 5 foot by 7 foot mural or as a 10 foot by 14 foot mural. Alternately, you could simply tell us how wide or how tall you would like it to be. The cost is based on the final size which can be calculated on our [prices page](#). These prices are for heavy gauge vinyl, for other materials just ask, we'll send you a quote.

Step 3

Send us your tile images to the address on the [contact us](#) page. Please include a printout from the [order form](#) page. These can be in any digital format, but we prefer jpg, bmp, gif or tiff. You can mail or ship them on a CD, DVD, compact flash card or zip disk. If there are both horizontal and vertical images the tiles can be square, in which case, some of the edges will be cropped. If all or most of the image are horizontal, we will use horizontal, tiles. Same thing goes with vertical tiles. The more tile images you have, the better the resulting mural will look. Also the more variety of colors and values in your image collection, the better the result will be.

Step 4

Once we have the images and information from above, within a few days we will use specialized software to create the best possible mural given the source image and the tile collection. The number of tiles we use to make up the image is also determined by how many images in your collection. The more the better! For example a 4 foot by 8 foot mural could have 48 x 96 square inch tiles or 4608 total tiles. If your image collection has only 200 images. each image will be repeated about 23 times. In any case, we will examine both the source and image collection and render the best image we can. At this point, we will e-mail a low resolution proof of the mural similar to the images you can see on our [gallery page](#).

Step 5

Once you have received the emailed proof, get back to us with the included approval form and invoice. You can pay by check or paypal. We will also honor purchase orders from schools. Once we receive your purchase order or payment and approval, the image will be printed either on photo quality paper in the case of a poster or heavy gauge vinyl or other materials in the case of a mural. The process takes about a week to complete and the finished

Prices

These prices are for our basic vinyl mural.

For murals larger than 10'x12' or for alternative materials, call or e-mail for a quote.
